

Special Issue

Atmospheric Mercury: Sources, Transport, and Fate

Message from the Guest Editors

The journal *Atmosphere* plans to publish a Special Issue on atmospheric mercury for the 16th International Conference on Mercury as a Global Pollutant (ICMGP 2024) held from 21 to 26 July 2024 in Cape Town, South Africa (<https://www.mercurycapetown.com/>). The topics of this Special Issue include, but are not limited to, the following: (1) measurement and modeling studies that address atmospheric mercury cycling questions at local, regional, and global scales; (2) process-orientated studies that address atmospheric mercury transformation and surface–atmospheric mercury exchange; and (3) mercury emissions to the atmosphere from natural and anthropogenic sources.

Prof. Dr. Che-Jen Lin

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
