Special Issue

Climate Change and Its Impacts in Arid and Semi-Arid Regions: Past, Present and Future

Message from the Guest Editors

We are delighted to announce a call for papers for a Special Issue on "Climate Change in Arid and Semi-Arid Regions and Its Impact", focusing on the major challenges and opportunities arising from climate change in these vulnerable ecosystems of dry regions. Contributions from a variety of disciplines that address the following key themes will be invited:

- Climate variability and extreme weather events;
- Impact of climate change on hydrology and water balance in arid regions;
- Water scarcity and management;
- Agricultural adaptation and food security;
- Land degradation and biodiversity loss;
- Arid cities:
- Human health and livelihoods:
- Climate policy and governance:
- Technological innovations and sustainable solutions;
- Social dimensions and community resilience.

We invite original research articles, reviews, and case studies that contribute to a deeper understanding of the impacts of climate change on arid and semi-arid regions, as well as innovative approaches to adaptation and sustainable development.

Guest Editors

Dr. Mohamed A. M. Abd Elbasit

Faculty of Natural and Applied Sciences, Sol Plaatje University, Kimberley 8301, South Africa

Prof. Dr. Jasper Knight

School of Geography, Archaeology and Environmental Studies, University of the Witwatersrand, Johannesburg 2050, South Africa

Deadline for manuscript submissions

26 December 2025

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
