

## Special Issue

# Study of Mitigation of PM<sub>2.5</sub> and Surface Ozone Pollution

### Message from the Guest Editor

*Atmosphere* is an open access journal featuring a new Special Issue, the scope of which is focused on studies of air quality issues. Particulate matter pollution and ozone pollution are the primary focus, but submissions are not limited to these. The [manuscript types](#) considered are review articles, research articles, letters, technical notes, and commentaries/replies. We welcome original studies bringing new insights in emission sources, atmospheric components, chemical and physical processes, impacts on public health, climate, economy, and ecosystems, mitigation strategies and policy relevant science. We encourage submissions investigating regulation measures and indoor air quality. To be considered for publication in *Atmosphere*, manuscripts should clearly show how this research advances current understanding or improve investigation methods.

### Guest Editor

Dr. Ying Chen  
Lancaster Environment Centre, Lancaster LA1 4YQ, UK

### Deadline for manuscript submissions

closed (18 December 2021)

## About the Journal

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
