

Special Issue

Selected Papers from “The 31st Nordic Conference on Meteorology (NMM31)”

Message from the Guest Editors

A special issue from the Nordic Meteorology Conference, held in Reykjavík in June 2018. A key denominator is applied meteorology and forecasting of weather and climate in the Nordic regions. This contains verification methods and comparisons of model results, probability forecasts, meteorology and climate for the energy sector, climate services, new data sources and observations and modeling in the Arctic.

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!
