Special Issue

Industrial Air Pollution: Emission, Management and Policy (2nd Edition)

Message from the Guest Editor

This Special Issue is the second volume in a series of publications dedicated to “Industrial Air Pollution: Emission, Management and Policy”. This series of Special Issues showcases the most recent findings related to industrial park air quality, emission characteristics, stationary source management strategies, standards and policies, air diffusion models, exposure risk and health effects, etc. We also collect papers discussing industrial source analyses and the evaluation of control strategies. Ultimately, the Special Issue aims to showcase the most recent comparable evidence concerning the impact of industrial air quality on people and organizations. Original results from the field and controlled investigations, subjective surveys, models and review papers related to industrial air pollution are all welcome contributions. Authors are encouraged to include a section pertaining to future issues, opportunities and/or concerns related to their topics from a 5-, 10- and 20-year perspective.

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini
Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
