Special Issue

Sources Influencing Air Pollution and Their Control

Message from the Guest Editors

This Special Issue aims to present a collection of original research articles and review papers describing the assessment of outdoor and indoor air quality; methods and solutions for the prevention, minimization and control of air pollution; assessment of industrial air pollution and its control; improvements in the management of air quality; impacts of air pollution on human health and the environment. Topics of particular interest to this Special Issue include (but are not limited to) the following:

- Air pollution;
- Air pollutants;
- Sources of air pollutants and their health effects;
- Air quality monitoring;
- Air pollution control;
- Air pollution prevention;
- The impact of air pollution;
- Changing air environmental factors;
- The dispersion of air pollutants;
- Industrial pollution of air environmental factors;
- Methods for minimizing air pollution;
- Emissions and immissions;
- Outdoor and indoor air quality;
- Outdoor and indoor air pollution;
- Sustainable development.

Guest Editors

Dr. Dana-Adriana ILUȚIU-VARVARA

Prof. Dr. Longyi Shao

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini
Institute of Atmospheric Sciences and Climate (ISAC), National Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (Environmental Science (miscellaneous))
