

Special Issue

Feature Papers in Upper Atmosphere

Message from the Guest Editors

We are pleased to announce that the journal *Atmosphere* is now compiling a collection of papers submitted by the editorial board members of our journal and outstanding scholars in this research field. We welcome contributions and recommendations from the EBMs. The purpose of this Special Issue is to publish a set of papers that typify the most exceptional, insightful, influential, and original research articles or reviews. We expect these papers to be widely read and highly influential within the field. All papers in this Special Issue will be collated into a printed edition after the deadline and will be well promoted. We would also like to take this opportunity to call on more scholars to join the journal *Meteorology* so that we can work together to further develop this exciting field of research.

About the Journal

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Editor-in-Chief

Dr. Daniele Contini

Institute of Atmospheric Sciences and Climate (ISAC), National
Research Council (CNR), Str. Prv. Lecce-Monteroni km 1.2, 73100
