

# Special Issue

## Quantum Dynamics of Matter in Tailored Intense Fields

### Message from the Guest Editors

This Special Issue focuses on theoretical investigations of matter (atoms/molecules/materials) under static electric fields, intense lasers, plasmonic, or confined electromagnetic fields.

## About the Journal

### Message from the Editor-in-Chief

The scope of *Atoms* is deliberately wide and encompasses a large part of theoretical and experimental atomic, molecular, nuclear, and chemical physics in order to encourage cross-disciplinary connections, while supporting the more traditional idea of individual subfields. The journal is also interested in papers concerning the computation and compilation of data related to applications in the above areas. Details of experimental methods and codes are welcome. Your research is taken seriously and peer-reviewed with care. I encourage you to contact me or any of the Editorial Board Members for further information.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, Inspec, CAPlus / SciFinder, INSPIRE, and other databases.

#### Journal Rank:

CiteScore - Q2 (Nuclear and High Energy Physics)
