

Special Issue

Many-Particle Dynamics in Collisions of Electrons, Positrons and Photons

Message from the Guest Editors

In this edition of special Issue we invite original contributions covering all aspects of electron, positron and photon interaction with atoms, molecules, ions and surfaces both from experimental and theoretical point of view. Such data are of high demand in plasma science, radiation physics and astrophysics and astronomy. Accurate calculations of some metastable ions are also welcome. We look forward to your contributions.

Guest Editors

Dr. Dhanoj Gupta

Department of Physics, School of Advanced Sciences, Vellore Institute of Technology, Vellore 632014, Tamil Nadu, India

Dr. Suvam Singh

Max Planck Institute for Nuclear Physics, Saupfercheckweg 1, 69117 Heidelberg, Germany

Dr. Paresh Modak

Physics, Kansas State University, Manhattan, KS 66502, USA

About the Journal

Message from the Editor-in-Chief

The scope of *Atoms* is deliberately wide and encompasses a large part of theoretical and experimental atomic, molecular, nuclear, and chemical physics in order to encourage cross-disciplinary connections, while supporting the more traditional idea of individual subfields. The journal is also interested in papers concerning the computation and compilation of data related to applications in the above areas. Details of experimental methods and codes are welcome. Your research is taken seriously and peer-reviewed with care. I encourage you to contact me or any of the Editorial Board Members for further information.

Editor-in-Chief

Prof. Dr. Pascal Quinet

1. Physique Atomique et Astrophysique, Université de Mons, B-7000 Mons, Belgium
2. IPNAS, Université de Liège, B-4000 Liège, Belgium
