Hearing Loss and Cognition: New Frontiers

Message from the Guest Editors

Emerging evidence suggests a link between hearing loss and cognitive decline. However, the scientific evidence supporting this association remains incomplete, and further studies are needed to confirm this link. This Special Issue aims to investigate whether all hearing restoration interventions, such as hearing aids, implantable devices, and cochlear implants in adults, can prevent or at least delay cognitive decline. All study designs are welcome, and given the multidisciplinary nature of this topic, we encourage submissions that involve collaboration among otolaryngologists, audiologists, psychiatrists, neuropsychiatrists, and neurologists.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
ENT Unit, Santa Maria delle Grazie Hospital, ASM Matera, 75100
Matera, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
