

Topical Collection

Translational Audiology

Message from the Collection Editor

This Topical Collection aims to bring together publications on the latest developments and applications of translational audiology, both in the clinic and the research laboratory. The focus is on multidisciplinary research, as we can only progress by working together: audiologists, physicians, biologists, physicists, and representatives of many other scientific disciplines.

Additionally, in this current collection, we will pay special attention to the reproducibility of published data. We support increasing reproducibility through rigor and transparency as a key to implementing new research solutions through translational audiology. Following the guidelines of local, national, and international Reproducibility Networks is strongly encouraged.

We encourage submitting papers that address approaches for diagnosing, monitoring, and treating auditory or vestibular disorders via a translational approach. A rigorous translational approach to audiological studies is expected to accelerate progress in developing and implementing new innovative solutions for patients with hearing and balance disorders.

Collection Editor

Prof. Dr. Agnieszka Szczepiek

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
ENT Unit, Santa Maria delle Grazie Hospital, ASM Matera, 75100
Matera, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
