Emerging Technologies in Audiology: Advancing Assessment, Intervention, and Accessibility

Message from the Guest Editors

Recent technological advances have drastically reshaped the field of audiology. From artificial intelligence-powered hearing aids to remote hearing healthcare delivery, emerging technologies are changing how we assess, treat, and support persons with hearing impairments. This Special Issue will explore the leading edge of technological innovation in audiological care, encompassing but not limited to AI applications, teleaudiology, virtual/augmented reality in rehabilitation, new diagnostic tools, and innovative hearing device technologies. We seek high-quality original research, systematic reviews, and perspective papers that critically reflect on the opportunities and challenges of translating such innovations into clinical service.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
ENT Unit, Santa Maria delle Grazie Hospital, ASM Matera, 75100
Matera, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed,
PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 26.2 days after
submission; acceptance to publication is undertaken in 4.6
days (median values for papers published in this journal in
the second half of 2025).
