

Special Issue

Cochleo-Vestibular Diseases in the Pediatric Population

Message from the Guest Editors

Vertigo and dizziness of at least moderate intensity affect more than 5% of school-aged children, leading to significant limitations in their ability to engage in educational and recreational activities. In early childhood, deafness can hinder school attendance and academic progress.

This Special Issue aims to explore current evidence-based insights into cochlear and vestibular disorders in children. It also seeks to highlight recent advancements in rehabilitative techniques. We welcome and encourage submissions that contribute to deepening our understanding of these important topics.

Topics will be centered on diagnostic and therapeutic aspects. Topics of interest include, but are not limited to, the following:

- Assessment and management of cochlear disease (children);
- Hearing loss and tinnitus;
- Cochlear implant, hearing aids, and medical drugs.
- Assessment and management of vestibular disease (children);
- Vestibular diseases;
- All forms of vestibular impairment;
- Vestibular rehabilitation.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
Vestibology & ENT Unit, Giovanni Paolo II Hospital, 07026 Policoro, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
