

Special Issue

Current Challenges and Advances in Inner Ear Disorders

Message from the Guest Editor

Hearing loss has a huge impact on the quality of life for millions of people. Correct diagnosis allows treatment for many of the peripheral and central vestibular disorders. Audiovestibular surgery and rehabilitation, including hearing aids, bone anchored hearing aids, cochlear/vestibular/auditory brainstem implantations should be performed early in the disease process to prevent chronic symptoms.

It is my pleasure to invite you and members of your research group to submit an article or review for a Special Issue on “Current Challenges and Advances in Inner Ear Disorders”. The scope of this Special Issue includes, but is not limited to:

- Inner ear fluids dynamics
- Hair cell regeneration
- Pathology and endolymphatic sac
- Endolymphatic hydrops
- Genetics, polymorphisms
- Inner ear imaging
- Vestibular testings (Vemps, video head impulse test)
- Intratympanic steroids, Gentamycin
- Cochlear implant
- Hearing aids, implantable hearing devices
- Vestibular rehabilitation

Guest Editor

Prof. Dr. George K. Psillas

1st Academic ENT Department, Aristotle University of Thessaloniki,
AHEPA Hospital, 546 36 Thessaloniki, Greece

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
ENT Unit, Santa Maria delle Grazie Hospital, ASM Matera, 75100
Matera, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
