

## Smart Robotics for Automation

Collection Editor:

**Dr. Felipe Martins**

Sensors and Smart Systems  
Group, Institute of Engineering,  
Hanze University of Applied  
Sciences, 9747 AS Groningen, The  
Netherlands

### Message from the Collection Editor

Topical Collection “Smart Robotics for Automation” is dedicated to publishing research papers, communications, and review articles proposing solutions to increase the efficiency of automation systems with the application of smart robotics.

Topics of interest are related to robotics automation. A non-exhaustive list is as follows:

- Process automation with intelligent robotics;
- Intelligent robotic applications for production systems;
- Robotics applied to precision agriculture;
- AI and machine learning systems applied to robotics;
- Robot control;
- Robot manipulation and picking;
- Mobile robot navigation, localization, and mapping;
- Interpretation of sensor data (including vision systems);
- Human–robot collaboration (including cobots);
- Multi-robot systems.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Eyad H. Abed**

Department of Electrical and  
Computer Engineering and the  
Institute for Systems Research,  
University of Maryland, College  
Park, MD 20742, USA

## Message from the Editor-in-Chief

*Automation* (ISSN 2673-4052) is a international peer-reviewed open access journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of automation and control system. Both experimental and theoretical papers are published, including all aspects of manufacturing systems, energy management systems, aerospace control systems, micro- and nano-systems, learning systems, intelligent control systems and so on. Automation organizes Special Issues devoted to specific automation and controlling areas and applications each year.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [ESCI \(Web of Science\)](#), [Scopus](#), [EBSCO](#), and [other databases](#).

**Reliable Service:** rigorous peer review and professional production.
