

Special Issue

Anniversary Feature Papers-2022

Message from the Guest Editor

As the Editor-in-Chief of *Automation*, I am pleased to announce the launch of the Special Issue entitled "Anniversary Feature Papers—2022." This Special Issue will be a collection of articles from Editorial Board Members and leading researchers, which will report on new research and cutting-edge developments in the science and engineering of automation and control systems. The Special Issue will welcome submissions pertaining to the following topics (below, "automation" also includes control and monitoring, related modeling and simulation issues, and other related subjects):

- Automation in vehicle networks and systems (land, marine, space and/or air vehicles);
- Automation in energy systems;
- Automation in learning systems and applications;
- Automation in cyberphysical systems.

Our survey received a great response from our Editorial Board Members. You are welcome to send a preliminary title and abstract to our Editorial Office (automation@mdpi.com) for evaluation. Alternatively, you are welcome to submit full papers of your recent research outcomes if they are within the scope of *Automation*. All contributions will be peer reviewed.

About the Journal

Message from the Editor-in-Chief

Automation (ISSN 2673-4052) is an international peer-reviewed open access journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of automation and control system. Both experimental and theoretical papers are published, including all aspects of manufacturing systems, energy management systems, aerospace control systems, micro- and nano-systems, learning systems, intelligent control systems and so on. *Automation* organizes Special Issues devoted to specific automation and controlling areas and applications each year.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Reliable Service:

rigorous peer review and professional production.
