

Special Issue

Selected Papers from the 34th Florida Conference on Recent Advances in Robotics (FCRAR 2021)

Message from the Guest Editors

This Special Issue comprises selected papers from the proceedings of the 34th Florida Conference on Recent Advances in Robotics (FCRAR 2021) that was held on 13–14 May 2021. FCRAR is a national conference with emphasis on robotic research areas, such as artificial intelligence for robots, kinematics, dynamics, and controls, robotic design, mobile and humanoid robots, autonomous and unmanned vehicles, machine vision, and mechatronics. It has been organized since 1988, and it has been held in one of the major Florida universities every year. In 2021, the University of West Florida (UWF) organized the conference. Authors of selected papers are invited to submit extended versions of their original papers and contributions with the following topics:

- Robot kinematics, dynamics, and controls;
- Serial and parallel manipulators;
- Mobile and humanoid robots;
- Medical applications of automation and robotics;
- Bio-inspired and biomimetic robotics;
- Soft actuators and sensors;
- Perception, localization, mapping, and path planning;
- Robotics, automation, and mechatronics in education.

Guest Editors

Dr. Hakki Erhan Sevil

Department of Intelligent Systems & Robotics, University of West Florida, Pensacola, FL 32514, USA

Dr. Mahdi Haghshenas-Jaryani

Mechanical and Aerospace Engineering Department, New Mexico State University, Las Cruces, NM, USA

Deadline for manuscript submissions

closed (31 May 2022)

About the Journal

Message from the Editor-in-Chief

Automation (ISSN 2673-4052) is an international peer-reviewed open access journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of automation and control system. Both experimental and theoretical papers are published, including all aspects of manufacturing systems, energy management systems, aerospace control systems, micro- and nano-systems, learning systems, intelligent control systems and so on. *Automation* organizes Special Issues devoted to specific automation and controlling areas and applications each year.

Editor-in-Chief

Prof. Dr. Eyad H. Abed

Department of Electrical and Computer Engineering and the Institute for Systems Research, University of Maryland, College Park, MD 20742, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Reliable Service:

rigorous peer review and professional production.
