Message from the Guest Editor

During the last decade, there has been an increased interest in fractional dynamics, as it was found that to play a fundamental role in the modeling of numerous phenomena, in particular, complex media, and long-memory media, or porous media. The aim of this Special Issue is to present recent developments in the theory, analytic as well as numerical. Potential topics include but are not limited to existence, stability, oscillatory and asymptotic behavior of solutions, numerical results, and applications in sciences and engineering.

an Open Access Journal by MDPI

Computer Science and
Mathematics, Public University of
Navarra, 31006 Pamplona, Spain

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (Mathematics, Applied)
