Special Issue

Advances in Complex Analysis and Geometric Function Theory with Applications

Message from the Guest Editors

The current Special Issue, "Advances in Complex Analysis and Geometric Function Theory with Applications", aims to publish new and modern results in the field of the theory of functions of a complex variable, and the theory of univalent and multivalent functions. The presentation of results obtained using any other techniques which can be applied in the field of complex analysis and its applications is welcome. We do hope that the distinctive aspects of the issue will bring the reader close to the subject of current research and leave the way open for a more direct and less ambivalent approach to the topic. We look forward to your contributions to this Special Issue.

Guest Editors

Prof. Dr. Jin-Lin Liu
Department of Mathematics, Yangzhou University, Yangzhou 225002, China

Prof. Dr. Hari Mohan Srivastava
Department of Mathematics and Statistics, University of Victoria, Victoria, BC V8W 3R4, Canada

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince
Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access
— free for readers, with article processing charges (APC) paid by authors or their institutions.
