Special Issue

New Methodological Perspectives in Health Statistics and Machine Learning

Message from the Guest Editor

I am pleased to announce the launch of a new Special Issue in *Axioms* entitled "New Methodological Perspectives in Health Statistics and Machine Learning". Despite being more than one century old, data analysis in health still remains a rich field of research in statistical theory and applications. The deployment of proper statistical models is key to facing many real-world problems, and it produces new inspiration for researchers both in the medical and statistical fields. Potential topics include but are not limited to:

- statistical models:
- machine learning;
- health applications;
- computational statistics.

Guest Editor

Dr. Elena Ballante

Department of Political and Social Science, University of Pavia, 27100 Pavia, Italy

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of Axioms is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Applied)
