

## Special Issue

# New Developments in Geometric Function Theory II

### Message from the Guest Editor

This Special Issue is a sequel to the successfully concluded first volume entitled “[New Developments in Geometric Function Theory](#)”. Following the same idea as the previous Special Issue, this new project aims to gather the latest developments in research concerning complex-valued functions from the Geometric Function Theory point of view. Scholars’ contributions are expected on topics which include but are not limited to:

- New classes of univalent and bi-univalent functions;
- Studies regarding coefficient estimates including Fekete-Szegő functional, Hankel determinants, Toeplitz matrices;
- Applications of different types of operators in Geometric Function Theory including differential, integral, fractional or quantum calculus operators;
- Differential subordination and superordination theories in their classical form and also concerning their recent extensions, strong and fuzzy differential subordination and superordination theories;
- Applications of different hypergeometric functions and orthogonal polynomials in the Geometric Function Theory.

---

### Guest Editor

Prof. Dr. Georgia Irina Oros

Department of Mathematics and Computer Science, University of Oradea, 410087 Oradea, Romania

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain
