Special Issue

Advances in Fixed Point Theory with Applications

Message from the Guest Editors

We cordially invite researchers to contribute their original and high-quality research papers to this Special Issue. Topics of interest include but are not limited to the following:

- Fixed point theory and best proximity point theory with applications;
- Fixed point theory for single-valued and multi-valued mappings in various abstract spaces with applications;
- Fixed-point theorems satisfying distinctive contractive conditions and their applications;
- Solvability of nonlinear differential and integral equations and inclusions;
- Stability of functional equations and inclusions;
- Fractional differential equations and inclusions;
- Coincidence points and common fixed-points;
- Unique and non-unique fixed-point theory;
- Numerical algorithms for nonlinear problems;
- Functional differential equations and inclusions;
- Optimization problems by fixed point theory;
- Geometry of Banach spaces;
- Well-posedness and control in fixed point theory;
- Successive approximations (such as Picard, Mann, Krasnoselskij, and Ishikawa iterations, and others);
- Linear and nonlinear dynamical systems;
- Applications to computer graphics.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of Axioms is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Applied)
