

Special Issue

New Developments in Geometric Function Theory, 4th Edition

Message from the Guest Editor

Since **geometric function theory** continues to be a prolific research field, following the success of the Special Issue series “**New Developments in Geometric Function Theory I, II** and **the third edition**”, a new volume of this Special Issue has been launched. This new Special Issue, which will continue on from the framework of the preceding three Special Issues, will attempt to compile papers on the most significant recent developments in the study of **complex-valued functions** from the perspective of **geometric function theory**. New findings derived from the application of any other methodologies in the field of **complex analysis** are welcome to be submitted. It is hoped that by highlighting fresh research directions in **geometric function theory**, researchers will find motivation to continue their efforts to generate new insights in this field.

Guest Editor

Prof. Dr. Georgia Irina Oros

Department of Mathematics and Computer Science, Faculty of Informatics and Sciences, University of Oradea, 410087 Oradea, Romania

Deadline for manuscript submissions

31 March 2026

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain
