

## Special Issue

# Hypercyclicity and Linear Dynamics

### Message from the Guest Editor

Hypercyclicity has been studied intensely during the last five decades. Indeed, the first example of hypercyclicity on Banach spaces was given by Prof. Rolewicz in 1969. Since then, numerous significant theories and concrete interesting examples in this very active subject were established. Hypercyclicity arises from the invariant subset problem in operator theory for bounded linear operators, which is related to some study of linear dynamical systems and topological dynamics. Hence in this special issue, we expect to collect research papers including the most recent progress, concerns and questions in this direction. Therefore, we cordially invite researchers to contribute their original and significant research papers which will inspire advances in hypercyclicity, linear dynamics and their applications.

### Guest Editor

Prof. Dr. Chung-Chuan Chen

Department of Mathematics Education, National Taichung University of Education, Taichung 403, Taiwan

### Deadline for manuscript submissions

closed (30 March 2024)

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
