

## Special Issue

# Advances in Generalized Hypergeometric Functions, Integral Transforms and Number Theory

### Message from the Guest Editors

The aim of this Special Issue is to showcase a compilation of both original research articles and review articles that cover any aspect of Generalised Hypergeometric Functions, Integral Transforms and Number Theory and related study areas with a wide range of applications (in particular, applications in Ramanujan's work). In order to encourage the ongoing efforts to produce effective transformations and applications related to the analysis of transformation, we invite mathematicians, researchers, and investigators to submit original research articles as well as review articles. We look forward to receiving your contributions.

---

### Guest Editors

Dr. Dongkyu Lim

Prof. Dr. Adem Kilicman

Prof. Dr. Arjun Kumar Rathie

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
