Special Issue

Differential Geometry and Its Application, 3rd Edition

Message from the Guest Editor

This Special Issue is a continuation of our previous Special Issue on "Differential Geometry and Its Application, 2nd edition". Our intention is to launch a Special Edition of *Axioms* in which the central theme would be the generalization of Riemann spaces and their mappings. We wish to provide an opportunity to present the latest achievements in many branches of theoretical and practical studies of mathematics, which are related to the theory of Riemann and generalized Riemann spaces and their mappings. Topics include but are not limited to:

- contact manifolds
- generalized Riemann spaces
- statistical manifolds
- kenmotsu manifolds
- kaehler manifolds
- golden manifolds
- invariants
- immersions
- complex space forms
- geodesic mappings

Guest Editor

Axioms

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince
Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access
— free for readers, with article processing charges (APC) paid by authors or their institutions.
