

## Special Issue

# Selected Works from IFSA-EUSFLAT 2021

### Message from the Guest Editors

We cordially invite you to submit your articles to the Special Issue of *Axioms* for works related to aggregation, pre-aggregation and implication functions presented on the Joint IFSA-EUSFLAT conference, which took place in Bratislava on Sept. 19–24 2021. This Special Issue will serve as a platform to expand and disseminate some interesting results related to the aggregation, preaggregation, and implication functions that were presented in the special sessions devoted to these topics in the meeting. Nevertheless, the submission is also open to other works which may be related to these topics and were presented in the conference, even if they were not included in those special sessions. We hope that this Special Issue will reflect the high quality and originality of the contributions.

### Guest Editors

Dr. Carlos Lopez-Molina

Prof. Dr. Javier Fernandez

Dr. Sebastia Massanet

### Deadline for manuscript submissions

closed (30 September 2022)

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.
