

## Special Issue

# Mathematical Methods in Computer Science

### Message from the Guest Editors

We are pleased to announce a forthcoming Special Issue of *Axioms* dedicated to the exploration of "Mathematical Methods in Computer Science". In the ever-evolving landscape of computer science, mathematical techniques serve as the bedrock upon which innovation and progress are built. This Special Issue aims to showcase the pivotal role of mathematical methods in advancing the field, emphasizing the crossroads between rigorous mathematical theory and practical computer science applications. Researchers are invited to submit their original research, theoretical developments, and practical applications in the intersection of mathematics and computer science. By fostering a multidisciplinary dialogue, this Special Issue aims to deepen our understanding of how mathematical methods continue to drive innovation and shape the future of computer science

---

### Guest Editors

Dr. Cedric Marco-Detchart

Department of Computer Systems and Computation, Universitat Politècnica de València, Valencia, Spain

Dr. Carlos Lopez-Molina

Department of Statistics, Computer Science and Mathematics, Universidad Pública de Navarra, Pamplona, Spain

---

### Deadline for manuscript submissions

closed (30 September 2024)

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public  
University of Navarra, 31006 Pamplona, Spain

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
