

## Special Issue

# Recent Advances in Complex Analysis and Applications, 2nd Edition

### Message from the Guest Editor

Complex numbers and complex analysis show up everywhere in mathematics and physics. This Special Issue, titled “Recent Advances in Complex Analysis and Applications II”, aims to provide a collection of high-quality original research articles and surveys in the field of Complex Analysis and Applications. Of particular interest are contributions addressing topics including, but not limited to, geometric function theory, quasiconformal harmonic maps, convex and starlike univalent functions, Lipschitz continuity and smoothness up to the boundary of solutions of the hyperbolic Poisson equation, spatial versions of Kellogg’s theorem, harmonic maps and maps which satisfy PDEs of second order, properties of mappings admitting general Poisson representations, Hardy spaces, extremal problems related to harmonic maps, etc. Original articles reporting recent progress as well as survey articles are also welcome to be submitted to this Special Issue.

### Guest Editor

Prof. Dr. Miodrag Mateljevic

Faculty of Mathematics, University of Belgrade, Studentski Trg 16, 11000 Belgrade, Serbia

### Deadline for manuscript submissions

31 March 2026

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public  
University of Navarra, 31006 Pamplona, Spain

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
