

Special Issue

Advances in Generalized Hypergeometric Functions, Integral Transforms and Number Theory, 2nd Edition

Message from the Guest Editors

The aim of this Special Issue is to showcase a compilation of both original research articles and review articles that cover any aspect of Generalised Hypergeometric Functions, Integral Transforms and Number Theory and related study areas with a wide range of applications (in particular, applications in Ramanujan's work). In order to encourage the ongoing efforts to produce effective transformations and applications related to the analysis of transformation, we invite mathematicians, researchers, and investigators to submit original research articles as well as review articles. We look forward to receiving your contributions.

Guest Editors

Dr. Dongkyu Lim
Prof. Dr. Adem Kilicman
Prof. Dr. Arjun Kumar Rathie

Deadline for manuscript submissions

31 January 2027

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
