

## Special Issue

# Advances in Algebraic Geometry

### Message from the Guest Editors

The aim of this Special Issue, which is devoted mainly to algebraic geometry, is to collect recent noteworthy results and original research focusing on the latest progress and developments in this research area and its applications. We hope that this Special Issue will provide a good platform for researchers in different areas of algebraic geometry to come together and exchange ideas on how we can further develop and apply algebraic geometry. Keywords include but are not limited to:

- Algebraic Varieties;
- Vector Bundles Over Projective Varieties;
- Symbolic Computation;
- Geometric Computation;
- Vectors; Matrix;
- Tensor Analysis;
- Combinatorial Algebraic Geometry.

---

### Guest Editors

Prof. Dr. Elena Guardo

Prof. Dr. Luca Chiantini

Prof. Dr. Edoardo Ballico

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public  
University of Navarra, 31006 Pamplona, Spain

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
