

Special Issue

Recent Advances in Nonlinear Differential Equations: Theory, Methods and Applications

Message from the Guest Editors

Differential equations attract the attention of many modern researchers due to their usefulness in solving theoretical or applied problems. The study of oscillatory phenomena is an important part of the theory of differential equations. Oscillations are relevant to virtually every area of applied science, including mechanics, electronics, radio engineering, and vibrotechnics. This Special Issue welcomes high-quality papers with original research results in theoretical research and recent progress in the study of applied problems in science and technology.

Guest Editors

Dr. Omar Bazighifan

Prof. Dr. Maria Alessandra Ragusa

Dr. Fahd Jarad

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public
University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Applied)
