

Special Issue

Theory and Application of Fixed Point

Message from the Guest Editors

This Special Issue will collect ideas on theoretical advances in the metric fixed-point theory and possible applications. We welcome both original research articles and articles discussing the current situation. Potential issues include but are not limited to the following:

- Iterative fixed-point theory;
- Fixed point theory and applications;
- Best proximity point theory and applications;
- Recursive mappings and convergence;
- Good exposure and control in fixed point theory and FDE;
- Nonlinear problems with fixed point theory approaches.

Guest Editors

Prof. Dr. Erdal Karapinar

Prof. Dr. Juan Martínez-Moreno

Prof. Dr. Inci M. Erhan

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
