

Special Issue

Computational Optimization and Applications

Message from the Guest Editors

We would like to provide an opportunity to showcase recent developments in the many methods of both theoretical and practical studies in Mathematics, which are related to mixed integer linear programming theory and/or its extensions and generalizations. But not limited to:

- Linear programming;
- Mixed-integer programming;
- Mixed-integer non-linear programming;
- Scheduling;
- Stochastic optimization;
- Mathematical modelling;
- Robust optimization;
- Deterministic method;
- Designed algorithm.

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public
University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
