

## Special Issue

# Decision Analysis with Optimization Technique

### Message from the Guest Editors

The optimization technique is well suited for dealing with emerging topics in decision making and analysis, which are often characterized by the need to make decisions in the face of uncertainty, conflicting objectives, limited resources, and complex trade-offs. In real-world applications, the formulation of decision-making problems and the utilization of optimization techniques to support decisions are particularly important. This is because the use of optimization techniques is really helpful for improving the quality for decision making and analysis. The journal of *Axioms* is therefore seeking papers on emerging topics in decision analysis with optimization techniques.

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
