

Special Issue

Differential Geometry and Its Application

Message from the Guest Editor

We would provide an opportunity to present the latest achievements in many branches of theoretical and practical studies of mathematics, which are related to the theory of Riemann and generalized Riemann spaces and their mappings. Among the topics that will address this particular issue, we can consider the following non-exhaustive list:

- Riemannian spaces and generalizations
- Kenmotsu manifolds
- Kaehler manifolds
- Manifolds with non-symmetric linear connection
- Cosymplectic manifolds
- Contact manifolds
- Statistical manifolds
- Minkowski spaces
- Geodesic mappings
- Almost geodesic mappings
- Holomorphically projective mappings
- Warped product of manifolds
- Complex space forms
- Quaternionic space forms
- Golden manifolds
- Inequalities
- Invariants
- Immersions.

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public
University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
