# **Fuzzy Control Systems: Theory and Applications**

## Message from the Guest Editor

The main aim of this Special Issue is to organize a forum to provide innovative approaches to handle various fuzzy controllers, adaptive control strategies, time-delay nonlinear systems, cooperative control, and hybrid intelligent control. We want to offer an opportunity for researchers and practitioners to identify new promising research directions in this area. **Keywords** 

- Type-1 fuzzy control
- Type-2 fuzzy control
- fuzzy neural networks in control
- metaheuristics in fuzzy control
- evolutionary fuzzy control
- genetic fuzzy control
- fuzzy PID control
- robot control

# **About the Journal**

# Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of Axioms is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.
