

Special Issue

Fuzzy Logic and Application in Multi-Criteria Decision-Making (MCDM)

Message from the Guest Editors

This Special Issue should provide an overview of research dealing with practical problem solving using fuzzy MCDM. In addition, it should be a platform for gathering the knowledge of theorists and practitioners in fuzzy logic and multi-criteria decision-making, which would improve both areas. Topics include, but are not limited to, the following:

- Application of classical fuzzy number in MCDM;
- Application of interval fuzzy number in MCDM;
- Application of Z – number in MCDM;
- Application of intuitionistic fuzzy numbers in MCDM;
- Application of hesitant fuzzy numbers in MCDM;
- Application of q-rung orthopair fuzzy numbers in MCDM;
- Application Pythagorean fuzzy numbers in MCDM;
- Application of spherical fuzzy numbers in MCDM;
- Neuro-fuzzy models for MCDM;
- Fuzzy system for MCDM.

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public
University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
