

Special Issue

A Hybrid Analysis of Information Technology and Decision Making

Message from the Guest Editor

We would like to invite you to submit your research in the area of information technology and decision-making techniques to the Special Issue, “A Hybrid Analysis of Information Technology and Decision Making”, in the journal *Axioms*. The effects of information technology on decision making and how the development of hybrid decision-making techniques affects information technology are welcome, including new information technology used in decision-making problems and novel hybrid decision-making methods developed in the information technology era. High-quality papers are solicited to address both theoretical and practical issues in the development of efficient information technology methods and a hybrid analysis of decision-making problems. Submissions that present new theoretical results, models, and algorithms, as well as new applications, are welcome.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.
