

## Special Issue

# A Hybrid Analysis of Information Technology and Decision Making

### Message from the Guest Editor

We would like to invite you to submit your research in the area of information technology and decision-making techniques to the Special Issue, “A Hybrid Analysis of Information Technology and Decision Making”, in the journal *Axioms*. The effects of information technology on decision making and how the development of hybrid decision-making techniques affects information technology are welcome, including new information technology used in decision-making problems and novel hybrid decision-making methods developed in the information technology era. High-quality papers are solicited to address both theoretical and practical issues in the development of efficient information technology methods and a hybrid analysis of decision-making problems. Submissions that present new theoretical results, models, and algorithms, as well as new applications, are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.
