Special Issue

Mathematical Logic and Applications

Message from the Guest Editors

It is our pleasure to announce the launch of our Special Issue, "Mathematical Logic and Applications". With this Special Issue, our goal is to offer contributing authors the opportunity to publish their recent results on mathematical logic and the foundations of mathematics. Particularly, we are interested in papers covering the following topics: set theory, model theory, proof theory, recursion theory, or algebraic logic. Contributions from related areas, such as philosophy or theoretical computer science are also welcome as long as mathematical logic methods are involved. Articles should be accessible to a large audience. Including but not limited to:

- General logic
- Set theory
- Axiomatic systems
- Model theory
- Proof theory
- Algebraic logic
- Recursion
- Theoretical computer science

Guest Editors

Dr. Andrei Alexandru

Dr. Bogdan Aman

Prof. Dr. Gabriel Ciobanu

Deadline for manuscript submissions

closed (20 June 2023)

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince
Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access
— free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:
indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:
JCR - Q2 (Mathematics, Applied)
