Special Issue

Nonlinear Dynamics and Chaos and Their Applications to Engineering and Science

Message from the Guest Editors

The SI will also be a great opportunity for disseminating recent developments of analytical and numerical techniques and for discussing novel phenomena and behaviors on several aspects of nonlinear dynamics and control. In addition, works related to relevant and current issues, such as epidemiological models, rumor dissemination, and complex systems, are also welcome. Researchers and practitioners are invited to submit their original research work on the rapidly developing field of Nonlinear Dynamics and Control of System Oscillations and their applications to Engineering and Science. Therefore, we encourage the submission of practitioners' latest unpublished work.

Prof. Dr. Angelo Marcelo Tusset

Dr. Diego Colón

Deadline for manuscript submissions

closed (30 November 2022)

Axioms

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince
Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access
— free for readers, with article processing charges (APC) paid by authors or their institutions.
