

## Special Issue

# Operator Theory and Its Applications

### Message from the Guest Editors

Functional analysis and operator theory are widely used in the description, understanding, and control of dynamical systems and natural processes in physics, chemistry, medicine, and the engineering sciences. This Special Issue is focused on the most recent advances in operator theory for theoretical and applied sciences arising in all fields of science, engineering applications, and other applied fields. The topics of the special issue include but are not limited to:

- Bounded and unbounded operators between Banach spaces;
- Matrix transformations on sequence spaces;
- Fine spectrum;
- Essential spectrum and Fredholm theory;
- Measures of noncompactness of operators;
- Generalized inverses;
- Operators in fixed point theory;
- Perov type contractions.

---

### Guest Editors

Prof. Dr. Vladimir Rakocevic

Department of Mathematics, Faculty of Sciences and Mathematics,  
Višegradska 33, Niš, 18000, Serbia

Prof. Dr. Eberhard Malkowsky

Department of Mathematics, State University Novi Pazar, Vuka  
Karadžića bb, Novi Pazar 36300, Serbia

## About the Journal

### Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public  
University of Navarra, 31006 Pamplona, Spain

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Mathematics, Applied)
