

Special Issue

Quantum Information, Foundations and Measurement

Message from the Guest Editors

Recent years have witnessed mutually beneficial interactions between theoretical ideas arising from quantum information science and developments in the foundations of quantum theory. In this Special Issue, we invite both original and review articles related to mathematical and theoretical aspects of quantum information and foundations, with particular emphasis on their intersection or on quantum measurement. However, we will also be pleased to receive high-quality papers on related topics.

Guest Editors

Dr. Takayuki Miyadera

Department of Nuclear Engineering, Kyoto University, Kyoto 6158540, Japan

Assoc. Prof. Leon Loveridge

Department of Science and Industry Systems, University of South-Eastern Norway, 3603 Kongsberg, Norway

Deadline for manuscript submissions

closed (28 February 2021)

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public
University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
