Special Issue

Theory and Mathematical Aspects of Black Holes

Message from the Guest Editors

This Special Issue will focus on theoretical and mathematical problems of black holes, of classical as well as quantum character. In this sense, original research or review articles in the following areas are welcome:

- Black hole formation
- Black hole stability
- Wave equations in black hole space-times
- Energy-momentum localization
- Quantum black holes
- Black hole thermodynamics
- Black hole accretion discs
- Black hole gravitational radiation
- Higher-dimensional black holes
- Topological black holes
- Stringy black holes
- Acoustic black holes
- Naked singularity of black holes
- Future possibilities of black holes

Guest Editors

Prof. Dr. Irina Radinschi

Dr. Theophanes Grammenos

Prof. Dr. Farook Rahaman

Prof. Dr. Saibal Ray

Dr. Marius-Mihai Cazacu

Deadline for manuscript submissions

closed (31 October 2020)

About the Journal

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of Axioms is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics, Computer Science and Mathematics, Public University of Navarra, 31006 Pamplona, Spain

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility:

indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Applied)
