Deadline for manuscript submissions:
closed (15 December 2018)

Message from the Guest Editor

Dear Colleagues,

In the past decade, electrochemical batteries have been developed as the key energy storage technology for a wide range of applications, from portable devices to electric vehicles and renewable energy storage systems. In order to benefit from their characteristics and to assess their suitability for a certain application, the lifetime and degradation behavior (e.g., capacity fade, power degradation) of a battery needs to be known and understood. This Special Issue of *Batteries* focuses on various aspects regarding the lifetime and degradation behavior of batteries.

Assoc. Prof. Daniel-Ioan Stroe
Guest Editor

keywords

- Electrochemical Batteries
- Lifetime Testing
- Accelerated Ageing
- Capacity Fade and Power Degradation
- Calendar and Cycle Lifetime
- Performance-Degradation Modeling
- Lifetime Estimation and Investigation
- Aging Mechanisms

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Electrochemistry*) / CiteScore - Q2 (*Electrochemistry*)
