Special Issue

Selected Papers from the 10th Academic Conference on Key Materials for Supercapacitors and Related Chemical Power Sources (2025)

Message from the Guest Editors

This Special Issue is jointly organized and initiated by the 10th Academic Conference on Key Materials for Supercapacitors and Related Chemical Power Sources and the MDPI journal *Batteries*. The scope of solicitation includes but is not limited to double-layer capacitors/pseudocapacitors, metal/non-metal ion capacitors, power electronic capacitors, organic batteries such as lithium/sodium/potassium, aqueous batteries, solid-state energy storage and wearable devices, hydrogen energy and fuel cells, electrochemical energy storage theory and calculation, electrochemical energy storage equipment and technology, electrochemical energy storage system and integration, etc. The purpose of this Special Issue is to strengthen relevant academic exchanges, cooperation, and the publication of the latest scientific research results in the industry, discuss domestic and foreign dynamics and frontiers, clarify industrial development trends, carry out industry-university-research cooperation, promote the research of supercapacitors and related chemical power source key materials and the development of new energy industries, and serve the national "dual-carbon" strategy.

Guest Editors

Prof. Dr. Lei Wang

Key Laboratory of Functional Inorganic Material Chemistry, Ministry of Education of the People's Republic of China, Heilongjiang University, Harbin 150080, China

Prof. Dr. Xinwei Cui

Henan Institute of Advanced Technology, Zhengzhou University, Zhengzhou 450003, China

Deadline for manuscript submissions

20 April 2026

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib

Department of Chemical and Materials Engineering, Concordia University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
