

Special Issue

Anode and Cathode Materials for Lithium-Ion and Sodium-Ion Batteries II

Message from the Guest Editor

Batteries invites submissions and article proposals for an upcoming Special Issue on topics related to Li-ion/Na-ion battery research. The 2019 Nobel Prize in Chemistry recognized the significance of Li-ion battery technologies, and the commercialization of Na-ion batteries has accelerated abruptly due to their unique performance and the abundance of the requisite raw materials. Topics should include, but are not limited to, the synthesis of anode and cathode materials, innovative electrode materials structures, high-performance batteries, low-cost electrode materials selection/production, etc. Battery performance improvements such as energy density, power density, cycle life, cost, operation temperatures, and safety are also within the scope of this Special Issue. We invite researchers and experts working in the field of energy storage applications to submit contributions.

Guest Editor

Dr. Yu-Sheng Su

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib

Department of Chemical and Materials Engineering, Concordia
University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
