

Special Issue

Enhancement of Lithium-Ion and Post-lithium Batteries Safety: Fundamentals, Materials and Applications

Message from the Guest Editors

Novel materials that are cheaper, safer and more sustainable for lithium batteries and their technology concepts are urgently required for the decarbonization of the energy system and the extensive market penetration of electric vehicles and stationary storage systems. Additionally, so-called post-lithium batteries based on, for example, sodium or magnesium ions, which no longer rely on lithium, are promising alternatives that offer significant potential. Therefore, the characterization of the electrochemical, thermal and safety properties of the cells and their individual active and passive materials are required to obtain quantitative and reliable data, which are needed to enhance our current understanding of this technology and design and develop superior and safer materials and cells. This Special Issue addresses all the techniques that are necessary for a holistic safety assessment of these batteries, from the materials to the cell and the application of lithium-ion and post-lithium batteries.

Guest Editors

Prof. Dr. Hans Jürgen Seifert

Head of Institute for Applied Materials (IAM-AWP), Karlsruhe Institute of Technology (KIT), Hermann-von-Helmholtz-Platz 1, 76344 Eggenstein-Leopoldshafen, Germany

Dr. Carlos Ziebert

Group Leader Batteries—Calorimetry and Safety, Institute for Applied Materials—Applied Materials Physics (IAM-AWP), Karlsruhe Institute of Technology (KIT), Hermann-von-Helmholtz-Platz 1, 76344 Eggenstein-Leopoldshafen, Germany

Deadline for manuscript submissions

20 February 2026

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib

Department of Chemical and Materials Engineering, Concordia
University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
