Special Issue

Advances in Hybrid Supercapacitors: Materials, Devices, Models, Systems, and Applications

Message from the Guest Editors

Hybrid supercapacitors are an emerging class of energy storage devices that combine the high power density of supercapacitors with the high energy density of batteries, offering a unique set of advantages that make them ideal for a wide range of applications. These devices are designed to provide a high level of power output in short bursts, making them well-suited for applications that require rapid charging and discharging, such as those related to electric vehicles or power tools. This Special Issue is focused on the recent advances in the field of hybrid supercapacitors, covering topics such as electrode materials, electrolytes, current collectors, device designs, modeling and simulations, energy management systems, applications, and safety issues. Contributions may cover, but are not limited to:

- Metal-ion hybrid supercapacitors;
- Battery-type supercapacitors;
- Aqueous hybrid supercapacitors
- Pb-carbon batteries;
- Ammonium ion capacitors;
- Oxide-based pseudocapacitors;
- Asymmetric supercapacitor.

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib
Department of Chemical and Materials Engineering, Concordia University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
